

## PROGRAMME: BCA SEMESTER- 4

### Teaching-Learning & Evaluation Plan

#### Course Information:

Course Code: Code: Course Title: Technical writing  
Credits Units: 02 Contact Hours: 45 L - T - P: 1-0-2  
CA: UE Weightage - 50:50 Pass Marks (IA and ESE): NA and 40% Aggregate Pass Marks: 40%  
UE Question Paper Marks: NA Special Examination Fees: NA Pre-requisite (if any): NA  
Course Facilitator (s): Jyothi Shanbhag/Mrunalini

#### Programme Outcomes (POs)

| PO   | Graduate Attribute                                   | Description                                                                                                                                      |
|------|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| PO1  | Computational Knowledge                              | Understand and apply mathematical, computing, and domain knowledge for conceptualizing computer-based solutions for real-world problems.         |
| PO2  | Problem Analysis                                     | Identify, critically analyze, and formulate complex computing problems using the knowledge of computer science and information technology.       |
| PO3  | Design and Development of Solutions                  | Design and develop computer-based systems and components for solving complex real-world problems using appropriate computing technologies.       |
| PO4  | Conduct Investigations of Complex Computing Problems | Design and conduct experiments, analyze and interpret data, and provide valid conclusions.                                                       |
| PO5  | Modern Tool Usage                                    | Recognize and use modern computing tools, and techniques necessary for innovative computer-based solutions.                                      |
| PO6  | Project Management                                   | Demonstrate engineering and management principles and practices to manage projects in multidisciplinary environments.                            |
| PO7  | Innovation and Entrepreneurship                      | Identify opportunities, use innovative ideas, and entrepreneurship mindset to create value and wealth for the betterment of self and society.    |
| PO8  | Communication Skills                                 | Communicate effectively in the workplace, collaborate, and contribute to achieve common goals.                                                   |
| PO9  | Individual and Team Work                             | Work as a member or leader in diverse teams in a multidisciplinary environment.                                                                  |
| PO10 | Professional Ethics                                  | Exhibit the professional attitude and ethics needed for a successful career in industry and academia.                                            |
| PO11 | Societal & Environmental Concerns                    | Recognize the social and environmental impacts of computer technology and demonstrate professional practices needed for sustainable development. |
| PO12 | Life-long Learning                                   | Recognize the need for and develop the ability to engage in continuous learning for personal and organizational growth.                          |

#### Programme Specific Outcomes (PSOs)

|             |                                                                                                               |
|-------------|---------------------------------------------------------------------------------------------------------------|
| <b>PSO1</b> | Identify, gather, clean, and transform data to make it suitable for data analytics.                           |
| <b>PSO2</b> | Demonstrate proficiency in mathematical, statistical, and computing techniques appropriate for data analysis. |
| <b>PSO3</b> | Employ modern tools and techniques for data analysis and visualization.                                       |
| <b>PSO4</b> | Develop data analytics solutions to address real-world business problems and support decision-making.         |

### Course Objectives:

|             |                                                                                                                                                                                                                                      |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>COB1</b> | This course is designed to guide students towards rhetorical, professional, and compositional competencies necessary to ethically and effectively create and analyse technical documents and communication.                          |
| <b>COB2</b> | This course provides the student with a working knowledge of various types of technical communication.                                                                                                                               |
| <b>COB3</b> | Technical communication competency will be accomplished through a structured exploration of professional/technical contexts and through the production of several documents and projects typical to many forms of technical writing. |
| <b>COB4</b> | Students can accurately communicate their thoughts, ideas, information, and messages in writing and create professional documents.                                                                                                   |
| <b>COB5</b> | Additionally, students will develop key skills in research, document design, usability design, project design and execution.                                                                                                         |

### Course Outcomes (Theory):

At the end of the course, students will be able to

| <b>Sl No</b> | <b>Course Outcome</b> | <b>Description</b>                                                                                                                                                                      | <b>Bloom's Taxonomy Level</b> |
|--------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------|
| 1            | CO1                   | Demonstrate rhetorical knowledge to create effective technical writing documents for end-users.                                                                                         | <b>L6</b>                     |
| 2            | CO2                   | Apply and adapt flexible writing process strategies to produce clear, high-quality deliverables in a multitude of technical writing genres.                                             | <b>L3</b>                     |
| 3            | CO3                   | Understand and use professional technical writing conventions of clean and clear design, style, and layout of written materials.                                                        | <b>L2</b>                     |
| 4            | CO4                   | Students will learn to analyze communication-related problems and develop solutions through the composition of technical documents from a number of genres and within several settings. | L4                            |
|              | CO5                   | Gather knowledge and apply researched information that is appropriate to your field, as demonstrated by reading and analyzing documents, and citing sources correctly.                  | <b>L1</b>                     |

| Criteria                                    | Excellent (5)                                                                                                                                                           | Good (4)                                                                                                                            | Satisfactory (3)                                                                                                                    | Needs Improvement (2)                                                                             | Unsatisfactory (1)                                                                    |
| <b>Title and Abstract</b>                   | Title is clear, concise, and accurately reflects the content. Abstract is comprehensive, summarizing the key objectives, methods, results, and conclusions effectively. | Title is clear and reflects the content. Abstract is clear but may miss one key element (objective, method, result, or conclusion). | Title is somewhat clear but may not fully reflect the content. Abstract summarizes the paper but lacks detail in one or more areas. | Title is vague or misleading. Abstract is incomplete or unclear, missing several key elements.    | Title and abstract are missing or do not reflect the paper's content.                 |
| <b>Introduction</b>                         | Provides a strong background, clear objectives, and a well-defined scope. Engages the reader and sets up the context for the research.                                  | Provides good background, objectives, and scope. Introduction is clear but could be more engaging or detailed.                      | Provides sufficient background and objectives. The scope is mentioned but may lack detail or clarity.                               | Introduction is incomplete, providing minimal background and unclear objectives or scope.         | Introduction is missing or fails to provide necessary context, objectives, and scope. |
| <b>Literature Review</b>                    | Comprehensive review of relevant literature. Demonstrates deep understanding and critical analysis of previous research.                                                | Good review of relevant literature. Shows understanding and some critical analysis of previous research.                            | Adequate review of literature. Shows basic understanding, but critical analysis is limited.                                         | Minimal review of literature. Shows limited understanding and lacks critical analysis.            | Literature review is missing or fails to relate to the research topic.                |
| <b>Methodology</b>                          | Clear, detailed, and appropriate methodology. All procedures and materials are well-documented,                                                                         | Clear and appropriate methodology, but some details may be lacking. Most procedures and materials are                               | Methodology is appropriate but lacks detail. Some procedures and materials are documented, but others are vague                     | Methodology is unclear or inappropriate. Many procedures and materials are not documented, making | Methodology is missing or completely inappropriate for the research.                  |

|                   |                                                                                                                                                                          |                                                                                                                                                               |                                                                                                                                                                       |                                                                                                                                           |                                                                                                      |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|
|                   | allowing for reproducibility.                                                                                                                                            | documented.                                                                                                                                                   | or incomplete.                                                                                                                                                        | reproducibility difficult.                                                                                                                |                                                                                                      |
| <b>Results</b>    | Results are clearly presented, well-organized, and thoroughly analyzed. Includes appropriate use of tables, figures, and statistical analysis.                           | Results are presented clearly and organized, but analysis may lack depth. Uses tables, figures, and statistical analysis effectively.                         | Results are presented, but organization is lacking. Some use of tables, figures, and statistical analysis, but may not be fully effective.                            | Results are poorly presented and disorganized. Minimal use of tables, figures, or statistical analysis, or they are not used effectively. | Results are missing or presented in a completely disorganized manner.                                |
| <b>Discussion</b> | Thorough interpretation of results. Discusses implications, limitations, and future directions. Demonstrates deep understanding of the research context.                 | Good interpretation of results. Discusses implications and limitations, but may lack depth in some areas. Demonstrates understanding of the research context. | Satisfactory interpretation of results. Some discussion of implications and limitations, but lacks depth or insight.                                                  | Minimal interpretation of results. Little discussion of implications and limitations, and lacks depth and insight.                        | Discussion is missing or fails to interpret results meaningfully.                                    |
| <b>Conclusion</b> | Strong, concise conclusion that summarizes key findings and their significance. Clearly relates back to the objectives and provides clear recommendations or next steps. | Good conclusion that summarizes key findings and their significance. Relates back to the objectives, but recommendations or next steps may be vague.          | Satisfactory conclusion that summarizes findings but may lack clarity or fail to relate back to the objectives. Recommendations or next steps are minimal or unclear. | Weak conclusion that fails to summarize key findings or relate back to the objectives. Lacks recommendations or next steps.               | Conclusion is missing or fails to summarize the research and its significance.                       |
| <b>References</b> | Comprehensive and correctly formatted reference list. Cites all relevant sources appropriately and consistently throughout the                                           | Good reference list, correctly formatted for the most part. Cites most relevant sources appropriately.                                                        | Adequate reference list, but some sources may be missing or incorrectly formatted. References are cited but may lack consistency.                                     | Minimal reference list with many missing or incorrectly formatted sources. References are inconsistently cited throughout                 | Reference list is missing or completely incorrect. Sources are not cited appropriately in the paper. |

|                                 |                                                                                                                                                         |                                                                                                                                                        |                                                                                                                                    |                                                                                                                                     |                                                                                                                                    |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
|                                 | paper.                                                                                                                                                  |                                                                                                                                                        |                                                                                                                                    | the paper.                                                                                                                          |                                                                                                                                    |
| <b>Writing Quality</b>          | Writing is clear, concise, and free of grammatical errors. Uses technical terminology appropriately. Excellent flow and coherence throughout the paper. | Writing is mostly clear and concise, with few grammatical errors. Uses technical terminology appropriately. Good flow and coherence.                   | Writing is generally clear but may have some grammatical errors. Uses technical terminology, but flow and coherence may be uneven. | Writing is unclear with many grammatical errors. Technical terminology is misused or absent. Poor flow and coherence.               | Writing is unclear and riddled with grammatical errors. Technical terminology is not used, and the paper lacks flow and coherence. |
| <b>Formatting and Structure</b> | Paper is well-structured, following the specified format. Includes all required sections and adheres to formatting guidelines.                          | Paper is well-structured with minor deviations from the specified format. Includes most required sections and mostly adheres to formatting guidelines. | Paper has a reasonable structure but may deviate from the specified format. Some required sections are incomplete or missing.      | Paper is poorly structured with significant deviations from the specified format. Many required sections are incomplete or missing. | Paper lacks structure and does not follow the specified format. Most required sections are missing or                              |

**Total Marks: 25**

### Activity: Technical Research Paper Writing Workshop

#### Activity 3: Resume Building

| Rubrics for Quality Check of Resumes |               |             |                                                                                               |                                                                                                    |                                                                                                 |                                                                                                                                                                                                                                                                                                                     |
