

CASE STUDY

Student Name:

USN:

Department: Computer Science & IT

Institution: JAIN (Deemed-to-be University)

Year: 2026

List of Case Study Topics

1. Student Information System using Model-View-Controller
2. Comparative Study of Nib vs Storyboard in iOS Apps
3. UI Development using Interface Builder vs Programmatic Approach
4. iOS Architecture Analysis using a Fitness Tracking App
5. Evolution of iOS Features (Old vs Latest Versions)
6. Role of Cocoa Touch Framework in App Development
7. Design of Simple Calculator App using MVC Pattern
8. Case Study on App Lifecycle in iOS
9. Performance Comparison of Different UI Rendering Methods
10. Security Features in Latest iOS Versions
11. Migration from Objective-C to Swift in a Legacy App
12. Banking Application using Swift Control Statements
13. Student Result Management using Arrays & Dictionaries
14. Library Management System using Swift Classes
15. Online Shopping Cart using Structures and Enumerations
16. Payroll System using Functions and Data Types
17. Traffic Signal Simulation using Decision-Making Statements
18. Quiz Application using Loops and Conditional Logic

19. Employee Hierarchy System using Inheritance
20. Chat Application Model using Swift Data Structures
21. Food Ordering System using Enum-based State Handling
22. Swift Error Handling in Real-world Applications
23. E-Learning App using Navigation Controller
24. Email Application using Master-Detail View Controller
25. Responsive Login Page using Auto Layout
26. Form-based App with Keyboard Handling
27. Multi-screen App using Segue Navigation
28. Memory Optimization in Image Gallery Apps
29. Shopping App UI using Multiple View Controllers
30. Music Player App Navigation Flow Design
31. Task Manager App using Table View Controllers
32. Dynamic Layout Design for Different Screen Sizes
33. Profile Management App with Editable Forms
34. Event Booking App UI Navigation Structure
35. Food Delivery App UI using TableView & CollectionView
36. Fitness Tracker using Accelerometer & Location Services
37. QR Code-based Attendance System
38. Multimedia Player (Audio & Video Streaming App)
39. Travel Guide App using Map View
40. Weather App using UI Components (Labels, Images, etc.)
41. Gesture-based Image Gallery (Zoom, Swipe)
42. E-commerce App with Push Notifications
43. Chat UI using TextView, ImageView, and TableView
44. Online Survey App using Switch, Slider, Picker View

- 45. Calendar App using Date Picker
- 46. Search-based Product Filtering App
- 47. Social Media Feed UI using Collection View
- 48. Smart Home Control App using Switches and Buttons
- 49. News Reader App with Scrollable Content
- 50. Image Picker-based Profile Upload App
